Sep 01, 2026 To Aug 31, 2027

AUDIT TYPE:

Announced Audit

AUDIT EXECUTIVE SUMMARY:

Pier C, Chatham Facility is located in a rural area of Chatham. The carrots and beets are transported from the farm to the cooling storage, where the facility receives, rinses, grades, washes with peracetic acid, sizes, weighs, and packages them in different formats. Product from farms is dumped at the exterior of the facility onto conveyors dedicated to transporting it to the packaging area, where it is rinsed, inspected, and sanitized. The activities were reviewed during the audit, and steps were challenged against the HACCP flow chart, and employees performing different activities were interviewed. Fifty-five employees were working in the different activities, including shipping and receiving. The products are distributed in refrigerated trucks to the USA and Canada.

Addendum(s)/Module(s) included in the audit:

Not Applicable

Product information for each product

Product Group/Product Name	Observed Product	Seasonality	Country of destination for product
Carrots (Whole)	Observed on the day of audit	From: July To: November	United States, Canada
