Sarah Krol

CERTIFICATE VALID FROM:

Aug 27, 2024 To Aug 26, 2025

AUDIT TYPE:

Announced Audit

AUDIT EXECUTIVE SUMMARY:

Harvesting in Pier C was performed on field 2A for carrots during the audit day. The harvest crew was composed of four employees, including the Farm Manager, who leads the harvesting activities. Harvesting is a mechanical process. Machinery is dedicated to picking the carrots directly from the ground to an inclined conveyor, where leaves are taken off before being transported through a conveyor to the wood bins, which are transported when the flatbed is packed to the transfer stations. The bins are transported using a contracted truck from the transfer stations to the Leamington site, where onions will be inspected, classified and packed. Carrots and beets are then transported to the Chatham facility for further processing.

Addendum(s)/Module(s) included in the audit:

Not Applicable

Product information for each product			
Product Group/Product Name	Observed Product	Seasonality	Country of destination for product
Carrots	Observed on the day of audit	From: July To: October	Canada
Onions	Not observed but of a similar risk type to what was observed*	From: July To: October	Canada
