AUDIT TYPE:

Announced Audit

AUDIT EXECUTIVE SUMMARY:

The Pier C Leamington site is located in the heart of Leamington. During the growing season, the site receives onions from its farms and approved suppliers as needed. The packaging area is equipped with a main line for cleaning, grading, packing, and palletizing onions in bulk. Onions are delivered in wood bins from the farm and dumped into the line. As the product moves along the conveyor, it is inspected for quality. The onions are transported via an inclined conveyor to an onion topper and brusher for grading and sizing. After grading, the onions are moved to automatic scales where they are bagged in various sizes: 50 lbs, 3 lbs, 2 lbs, and 10 lbs. If the onions are already sized by the company or approved suppliers, they are sent directly to the automatic weighers and baggers. On the day of the announced audit, only products sized by suppliers from the USA were packed. Harvest season begins at the end of July or in August, with the product being stored and distributed to Canada and the USA.
